When you unwrap the furniture, you will see brackets attached to the bottom of each unit. Turn the brackets (A) so that protrude out of the side of the sofa so that they will then clip into the bracket (B)

Care Instructions

Please periodically check all fittings and re-tighten as necessary.

Upholstered furniture should not be exposed to direct sunlight for long periods.

Please do not place your upholstery in direct contact with a strong heat source. Leave a 30cm gap between upholstery and radiators.

Please do not allow children to jump up and down on the upholstery.

Avoid allowing pets on the upholstery as their claws may cause damage to the fabric.

Avoid sitting on the arms of the upholstery or on the front edge of the seat as this can compress the foam and damage the frame of your upholstery causing premature wear and distortion.

When your new sofa arrives, you may notice that some of the cushions may have been creased or squashed during transit. This can be simply corrected by gently patting the cushions back into shape to re-distribute the filling and reshape the covering.

Please note that this product should never be used other than as a sofa - it is not a bed and should not be used as a substitute for a bed.

Our fixed cover fabric sofas can be cleaned by using water and a neutral soap to remove stains. Always apply the treatment to a concealed area first
